

## Coverage and Outreach

News agency promo-poster in Melbourne, Australia, 14 Nov. 2017

This document gives an overview of the coverage and outreach of the Global Carbon Budget 2017 release and associated publications and activities. It is intended to inform the team on how their work was reported and perceived worldwide. It is not exhaustive but still provides much detail to guide future outreach efforts.

### PRODUCTS 13 NOV 2018

1. Three papers (ESSD-CorinneL, NatureCC-GlenP, ERL-RobJ)
2. Data and ppt
3. GCP carbon budget webpage updates
4. Global Carbon Atlas updates
5. One Infographic
6. One Video (English, Spanish)
7. Two blogs (The Conversation-Pep, CarbonBrief-Glen)
8. Seven press releases (UEA, CICERO, Stanford University, CSIR-South Africa, China-Fudan University, Future Earth, European Climate Foundation)
9. Multiple Twitter and Facebook feeds.
10. Key Messages document (internal)

### SUMMARY OF COVERAGE AND OUTREACH

- Media outlet coverage within the first week after publication (print and online; based on Meltwater searches on “Global Carbon Project”, “Global Carbon Budget”, “Global Carbon

Budget 2017” and “2017 Global Carbon Budget” run by European Climate Foundation): Global coverage in **99 countries** with a total of 2,792 media items (this count doesn’t include UK media), in **27 different languages**.

- OECD dominates coverage (particularly USA, UK, France, Germany, Canada, and Australia), but almost equally large coverage in China, India and Brazil (a great leap forward over previous years). South east Asia and Central/South America (except Brazil) some coverage too. Key to this success was working for the first time with the Climate Change Foundation facilitated by Future Earth (Owen, Alistair).
- Most top newspapers and media outlets in those countries report the results.
- Notable exceptions (based on Meltwater analysis) are Africa (except South Africa), Japan, Sweden, and New Zealand.
- Google News (.au) on “Global Carbon Project” gives 12 pages.
- Radio and Podcast: NPR-USA, ICI-Canada, RTL-France, Positive Feedback (podcast), others
- TV interviews: tv2-norway, BBC, Islam Channel, Aljazeera, TeleSur, others.
- GCP Website: 9,500K unique visits from 144 countries, 10 top countries: various EU countries, USA, Australia, including China and India. A number of African countries with one visitor only (counts at end of first week after release)
- Atlas Website: 3,900 unique visits from 108 countries.
- Robbie’s website (Figures+Data): 800 visits (first week).
- Twitter Impressions: 283,000 (Glen), 97,000 (GCP-Pep), 80,000 (Pep), 12,000 (Future Earth): Total: 472,000 (“Impressions” are any kind of engagement with the tweet: click on visual or link; retweet, like, comment) (counts on first two weeks)
- GCP Facebook: 1,400 likes
- Blogs: The Conversation article: 11,900 readers (at April 2018), top countries from USA, Australia, Denmark, UK, Others.
- Future Earth - Global Carbon Budget 2017 Video, YouTube: 6,200 views English, and 500 views Spanish (April 2018).
- Overall, we assess that media coverage and overall impact for the 2017 release was among the top three years with most coverage.

## PRE-COP23

1. [COP23: Writing the Paris accord rule book](#) Deutsche Welle (main German paper) used Atlas as a source for a figure in their main article to present the objectives and relevance of COP23.
2. [US at climate talks may be like unhappy dinner guest](#) Business Insider-2017. 11. 8. In 2014, coal accounted for 46 percent of the globe’s carbon dioxide ... Peters, a Norwegian scientist who is part of the Global Carbon Project.
3. [Three years to safeguard our climate : Nature News & Comment](#) <https://www.nature.com/news/three-years-to-safeguard-our-climate-1.22201>, Jun 28, 2017 - Christiana Figueres and colleagues set out a six-point plan for ... the risks of abandoning the planet to climate change are too great to ignore. They used GCP data to make main figure.

## DURING-COP23

1. GCP Press Conference (Corinne and Glen) and Side Event with several talks at COP23, Bonn.
2. Australian Science Media Center press conference (Pep), online, 13 Nov.
3. UN Secretary General Antonio Guterres talks about the GCP results. The UN Sec Gen, in his opening remarks today (after 19:10 minutes): “The Global Carbon Project reported this week that 2017 will see the first increase in CO2 emissions in three years”.  
<https://youtu.be/J821sZPGkY4?t=14>
4. US Senator asks for GCP data. From: Zeke Hausfather

[<mailto:zeke.hausfather@carbonbrief.org>] Sent: Tuesday, November 14, 2017 8:08 PM  
To: Glen Peters <[glen.peters@cicero.oslo.no](mailto:glen.peters@cicero.oslo.no)> Subject: Re: Global Carbon Budget 2017  
Hi Glen,  
Congrats on the successful GCB launch! I just got an email from the aids of a US Senator asking if estimated 2017 emissions for Japan and Germany are available, or if they are just lumped in with the rest of the world in the estimation approach with no easy way to separate them out.

5. Pep presents Carbon Budget 2017 to Australian Government, Department of Environment and Energy.

## POST-COP23

1. The World Meteorological Organization invites the GCP to make a formal contribution to the [Statement of the State of the Global Climate in 2017](#) (released March 2018). This statement is the single most authoritative update on global climate trends and is translated into multiple languages.
2. The UNFCCC Subsidiary Body for Scientific and Technical Advice (SBSTA) invites the GCP to participate at discussion panel in the Research Dialogue of SBSTA 48 meeting in Bonn. Corinne to attend.
3. A number of approaches by NGOs, consultants and think tanks (eg, The Economist Intelligence Unit) requesting data, interpretation, and permission to reproduce figures. Multiple emails acknowledge the value of the release and the data/visual information.

## Media items

Different sections may have some level of overlap; don't include in this list the 2,700 media items identified by the European Climate Foundation analysis; they are available if interested.

## Corinne Le Quéré

See at the end (long).
